1 Section

1.1 Theorem:

let A be an element of R such that:

$$\begin{aligned} c_i &= \langle\psi|\phi\rangle, \quad c_i = \langle\psi|\phi\rangle \\ c_i &= \langle\psi|\phi\rangle, \quad c_i = \langle\psi|\phi\rangle \end{aligned} \tag{1.1}$$

Then the final result is:

$$\boxed{\begin{aligned} c_i &= \langle\psi|\phi\rangle, \quad c_i = \langle\psi|\phi\rangle \\ c_i &= \langle\psi|\phi\rangle, \quad c_i = \langle\psi|\phi\rangle \end{aligned}} \tag{1.2}$$

let A be an element of such that:

$$\frac{1}{2} = 1/2 + 0 - 0 \tag{1.3}$$
